- React
- Node.js
- MongoDB

Projects

❖ Bookstore Project

- Developed a **Bookstore web application** using React.js, Node.js, MongoDB that allows users to browse, search, and purchase books online. Implemented both admin and user dashboards to manage books, orders, and authentication seamlessly.
 - Designed the frontend interface using React.js and reusable components.
 - Developed RESTful APIs in Node.js and Express for CRUD operations.
 - Connected application with MongoDB database using Mongoose ORM.

❖ Movie Recommendation Website

- Designed and developed a **Movie Recommendation Website** that recommends movies based on user preferences and trending categories. The application features a clean and responsive UI built with modern web technologies. Integrated external movie APIs to fetch real-time data such as ratings, genres, trailers, and descriptions. Implemented search and filter functionality to enhance user experience and content discovery.
